Free Medical Dictionary is a very simple app that gives you access to all the medical Dictionary area, you can either search directly for medical terminology and symptoms in the search box, or browse through the alphabetized listings. The results are displayed in the main interface, and seem to be fairly accurate and easy to read. The Free Medical Dictionary Web Search is just a link to Google. It doesn't have any navigation buttons, so it's really not a very comfortable way to browse terms. As so far as options go, Free Medical Dictionary auto-updates and has an option to stay on top (which, incidentally, it doesn't save after closing a session), but that's it. Free Medical Dictionary does exactly what you'd expect. Some users might find its centralization useful and others will appreciate an offline dictionary. For most of us, however, it's an overly simple and featureless app that isn't really worth a download. Other than centralization, Free Medical Dictionary hasn't really got much going for it.
